

MOHD NAFEES

DATA ANALYST | SQL • EXCEL • POWER BI • PYTHON

London, UK | +44 7930 221 035 | nafees.mohd.datascientist25@gmail.com | linkedin.com/in/nafees-mohd-59863524b | github.com/Combatant94 | Portfolio: combatant94.github.io

London-based | Open to on-site, hybrid or remote roles across the UK

PROFILE

MSc Data Science graduate (Merit) who turns messy UK public data into reporting people can rely on. Reconciled 220,650 official insolvency records exactly against published statistics, traced a classification gap affecting 77.8% of 80M+ NHS records to its root cause before reporting, and built four live dashboards (combatant94.github.io). Confident in SQL, Excel and Power BI, with Python for modelling. Currently working in a busy customer-facing team at Marks & Spencer.

CORE SKILLS

Data processing: Excel (pivot tables, lookups, Power Query), SQL (MySQL, SQL Server: joins, aggregation, views), Python (Pandas, NumPy)

Data quality: validation, reconciliation to source, investigating and documenting data issues, root-cause analysis, QA checks

Reporting: Power BI, DAX, KPI dashboards, plain-English summaries for non-technical colleagues

Ways of working: learning new systems quickly, accuracy under deadlines, team collaboration, using AI tools responsibly to speed up coding and documentation

DATA ANALYTICS EXPERIENCE

Data Analyst (Independent Projects) — Self-directed portfolio 2024 – Present

End-to-end analysis of official UK and public datasets, published with live dashboards · combatant94.github.io

NHS Waiting Times — Data Processing & Issue Investigation 2025

Python · SQL Server · Power BI · [Live dashboard](#)

- Processed 77M+ raw monthly NHS records into a clean 7,544-row analytical dataset, reusable SQL Server views and a 15-KPI Power BI dashboard.
- Investigated why 77.8% of records fell into an “Other” category: tested my classification rule against all 104 source wait-band labels, found it covered only 12, and documented the gap before results were reported.

UK Business Distress Monitor — Validation & SQL Pipeline 2026

Python · MySQL · SQL · [Live dashboard](#)

- Checked 220,650 official records against published statistics before any analysis, reproducing 44/44 monthly totals and 272/272 industry groups exactly.
- Built a MySQL fact/dimension schema and reusable SQL views, and combined the data with a second ONS source to produce consistent monthly reporting.

UK Food Price Tracker — What Really Drove Food Inflation 2026

Python · SQL · ONS data · [Live dashboard](#)

- Weighted 11 food categories by household spending to show what moved the bill: oils and fats rose most (+70%) but dairy and bread drove inflation. Compared the same product in the same shop across 75,000+ ONS prices (2021 vs 2025), landing within 1 point of the official figure.

Machine Learning Intern — Learnvista Pvt Ltd, India Nov 2022 – Nov 2023

- Prepared, cleaned and checked structured datasets in Python and R, and documented methods and results clearly.

OTHER EXPERIENCE

Customer Assistant — Marks & Spencer, London Mar 2026 – Present

- Work accurately in a busy, high-volume team, meeting daily operational deadlines while priorities change.
- Resolve customer queries by checking details carefully and coordinating with colleagues.

Teaching Assistant — Workwell via Zen Educate, London Jan 2026 – Mar 2026

- Maintained accurate attendance and assessment records to fixed deadlines in busy school settings.

EDUCATION

MSc Data Science — Merit — Birkbeck, University of London 2024 – 2025

BSc Information Technology Management for Business — 2:1 — University of Hertfordshire 2015 – 2018
