

MOHD NAFEES

DATA ANALYST | SQL • EXCEL • POWER BI • PYTHON

London, UK | +44 7930 221 035 | nafees.mohd.datascientist25@gmail.com | linkedin.com/in/nafees-mohd-59863524b | github.com/Combatant94 | combatant94.github.io

London-based | Open to on-site, hybrid or remote roles across the UK

PROFILE

MSc Data Science graduate (Merit) who turns messy UK public data into reporting people can rely on. Reconciled 220,650 official insolvency records exactly against published statistics, traced a classification gap affecting 77.8% of 80M+ NHS records to its root cause before reporting, and built three live dashboards (combatant94.github.io). Confident in SQL, Excel and Power BI, with Python for modelling. Currently working in busy customer-facing teams at John Lewis Partnership and Marks & Spencer.

CORE SKILLS

Data processing: Excel (pivot tables, lookups, Power Query), SQL (MySQL, SQL Server: joins, aggregation, views), Python (Pandas, NumPy)

Data quality: validation, reconciliation to source, investigating and documenting data issues, root-cause analysis, QA checks

Reporting: Power BI, DAX, KPI dashboards, plain-English summaries for non-technical colleagues

Ways of working: learning new systems quickly, accuracy under deadlines, team collaboration, using AI tools responsibly to speed up coding and documentation

SELECTED DATA PROJECTS

NHS Waiting Times — Data Processing & Issue Investigation

2025

Python • SQL Server • Power BI • live dashboard on combatant94.github.io

- Processed 77M+ raw monthly NHS records into a clean 7,544-row analytical dataset, reusable SQL Server views and a 15-KPI Power BI dashboard.
- Investigated why 77.8% of records fell into an “Other” category: tested my classification rule against all 104 source wait-band labels, found it covered only 12, and documented the gap before results were reported.

UK Business Distress Monitor — Validation & SQL Pipeline

2026

Python • MySQL • SQL • github.com/Combatant94/uk-business-distress-monitor

- Checked 220,650 official records against published statistics before any analysis, reproducing 44/44 monthly totals and 272/272 industry groups exactly.
- Built a MySQL fact/dimension schema and reusable SQL views, and combined the data with a second ONS source to produce consistent monthly reporting.

London House Price Predictor — Regression Model

2024

Python • scikit-learn • statsmodels • live predictor on combatant94.github.io

- Cleaned 157,603 London sales, engineered location and property features, compared OLS, Ridge, Lasso and ElasticNet (R^2 0.836 on held-out data), and turned the model into a live estimator.

PROFESSIONAL EXPERIENCE

Customer Assistant — John Lewis Partnership, London

Sep 2026 – Present

- Help customers and keep the shop floor running smoothly in a busy London store, working accurately to shift deadlines.

Customer Assistant — Marks & Spencer, London

Mar 2026 – Present

- Work accurately in a busy, high-volume team, meeting daily operational deadlines while priorities change.
- Resolve customer queries by checking details carefully and coordinating with colleagues.

Teaching Assistant — Workwell via Zen Educate, London

Jan 2026 – Mar 2026

- Maintained accurate attendance and assessment records to fixed deadlines in busy school settings.

Machine Learning Intern — Learnvista Pvt Ltd, India

Nov 2022 – Nov 2023

- Prepared, cleaned and checked structured datasets in Python and R, and documented methods and results clearly.

EDUCATION

MSc Data Science — Merit — Birkbeck, University of London

2024 – 2025

BSc Information Technology Management for Business — 2:1 — University of Hertfordshire

2015 – 2018
